

# Riopel vertical mailboxes with "interlok" and "lockout" ANTI-PRYING systems

## THE RIOPEL DIFFERENCE

- A full line of products for residential, commercial, office and institutional buildings.
- Standard and Customized mailboxes for the Post Office.
- Mailboxes for private mail services.
- Technical assistance and computer generated shop drawings for Architects and Contractors.
- Customized products and solutions.

## QUALITY

Riopel has been manufacturing mailboxes and postal specialties for over 50 years. Since its inception, Riopel has built an enviable reputation for quality and functionally suitable products, adapting continuously to the needs of users in modern apartment complexes and office buildings as well as schools, hospitals, institutions and other customer groups requiring internal document distribution systems.

## AUXILIARY SERVICES

Exclusive shop drawings with wall openings and all details supplied on request and with all enquiries and quotations. Architects' detailed product specifications also available. Being a full line manufacturer, we are able to incorporate new design approaches into our mailbox products, and also do customized work to satisfy particular needs.

**GENERAL:** Door locks are 5 pin cam type with 1000 changes. Doors have windows with numbers or solid with engraved plastic tab. Engraved doors optional (Aluminum).
